

## JÁNOSSY FERENC MEMORIAL CONFERENCE – 2009

This conference is organized in order to commemorate of Ferenc Jánossy, who invented a way to measure the growing rate of the economy. Through his scientific achievements he won the State Prize and the Lukács György Award.

Furthermore this is a good possibility to gather the Specialized Colleges in order to have them all present and in this way each will get a chance to improve skills by lecturing or listening to other presentations.

We think this is a good way to make an impact by giving a chance to improve our academic standards.

Our College has its memorial conference every March, around the anniversary of Ferenc Jánossy's death.

**The Jánossy Ferenc Memorial Conference – 2009 is going to be held on 19-20<sup>th</sup> of March in this year.**

We are open for every inquiring person who would like to become participant with a presentation or both publication and presentation.

Topics are not restricted. If you would like to join this scientific forum, please contact us by sending an e-mail to the address below:
